

HIGH-RISE CONSTRUCTION

LIMESTONE CLAMP KSZ 300 UNI

Top Performer featuring Savings Potential

Optimize your logistics of building materials. It's worthwhile!

► Comprehensive studies are showing an enormous waste of money concerning especially the transport of building material. Take advantage of the industrial engineering reserves.

► The Probst limestone clamp has been developed specially for the transport of limestone elements by tower crane. Very quickly the clamp can be hung in every crane hook. Due to an innovative construction with a flexible gripping range of 750 to 1,000 mm, packages of different size can be gripped and transported quickly and securely to the place of employment where they are unloaded easily.

► The carrying capacity is 1,250 kg (2,750 lbs), the inside height 300 mm.

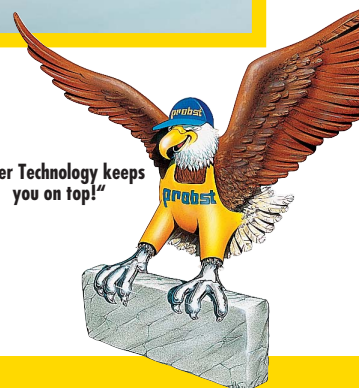

Simple and quick handling – high security standard

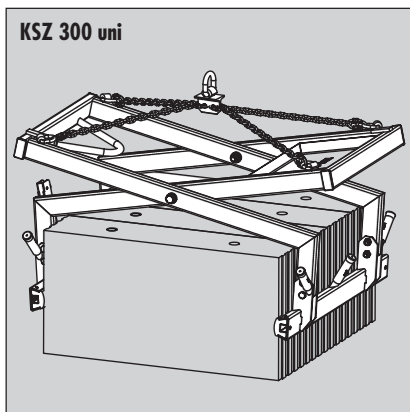

► The safety net is simple to handle and is suitable also for blocks with a height of 625 mm. It is fastened to a retaining bracket and is swivelling underneath the load.

„Better Technology keeps you on top!“

High time to grab for it

Lime Stone Clamp KSZ 300 uni

Especially designed for the transportation of lime stone elements by a tower crane. The clamp is gripping variable all packs up to the indicated opening width safely. An adjustment of the gripping width is no longer necessary.

Safety net also suitable for blocks with height 625 mm.

Standard Specifications:

- ▶ Crane eye
- ▶ Safety net
- ▶ Fully automatic release from "full" to "empty".
- ▶ Rubber metal bars as gripping elements (bright model – no marks left on visible brick work).

Type	Gripping range* mm (in)	Height E mm (in)	Gripper Length L mm (in)	Carrying Capacity kg (lbs)	Dead Weight kg (lbs)	Order-Number
KSZ 300 uni	750 - 1,000 (29 1/2 - 39")	300 (11 3/4")	1,000 (39")	1,250 (2,750)	95 (210)	5520.0033

* The gripping range indicates the minimum and maximum pack measurements, which can be handled with this clamp.
